### **Auswertungsbericht zur studentischen Lehrveranstaltungsbeurteilung**

Sehr geehrter Herr Prof. Dr. Teubner,  
als Anlage erhalten Sie die Ergebnisse der automatisierten Auswertung zu  
Ihrer Veranstaltung "Architektur und Implementierung von  
Datenbanksystemen" im Rahmen der studentischen  
Lehrveranstaltungsbeurteilung.

Der Ergebnisbericht gliedert sich in drei Abschnitte:

a) Auswertung der geschlossenen Fragen

In diesem Abschnitt werden die Ergebnisse der geschlossenen Skalafragen  
grafisch durch ein Histogramm und ergänzt durch numerische Angaben  
aufbereitet. Zu den statistischen Kennzahlen zählen die relativen  
Antworthäufigkeiten sowie zusätzlich das arithmetische Mittel, der Median,  
die Standardabweichung und die Anzahl der Nennungen.

b) Profillinie

Zur schnellen und übersichtlichen Orientierung zeichnet die Profillinie eine  
gestrichelte Linie der Mittelwerte zu den Skalafragen. Zusätzlich werden der  
Mittelwert und die Anzahl der Nennungen numerisch angegeben.

c) Auswertung der offenen Fragen

Die Auswertung der offenen Fragen wird in Form von Bildausschnitten  
dargestellt. Wurde eine Online-Befragung durchgeführt bzw. die  
Handschriften manuell erfasst, erscheinen die Antworten entsprechend in  
Maschinenschrift.

Wurden für den verwendeten Fragebogen (FK04TU10) Globalindikatoren  
definiert, werden diese am Anfang des Berichtes dargestellt. Die Indikatoren  
bilden den Mittelwert zu einer thematischen Fragengruppe und ermöglichen  
einen schnellen Überblick über die Ergebnisse der Befragung.

Für Rückfragen zur Lehrevaluation wenden Sie sich bitte an die  
Ansprechpartnerin bzw. den Ansprechpartner in Ihrer Fakultät.

Bei technischen Fragen stehe ich Ihnen gerne zur Verfügung.

Mit freundlichen Grüßen

i.A.

**Erfasste Fragebögen = 13**

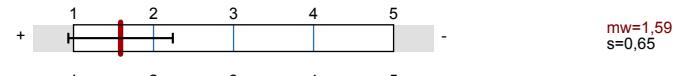

### Globalwerte

## Globalindikator

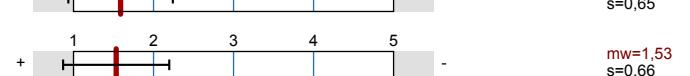

Evaluation of the content of the course

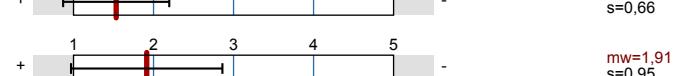

Evaluation of lectures

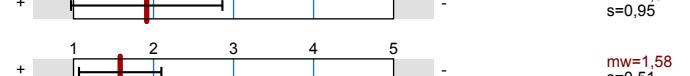

Evaluation on course and lecture materials

Evaluation of the tutorials

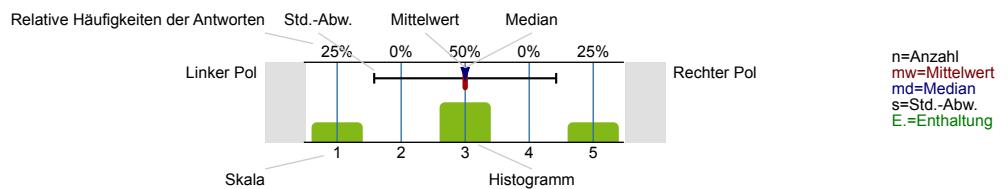

Overall score for the course

### Auswertungsteil der geschlossenen Fragen

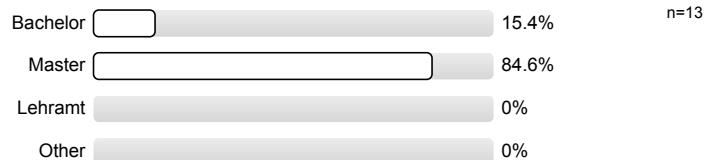

## Legende

Frage text

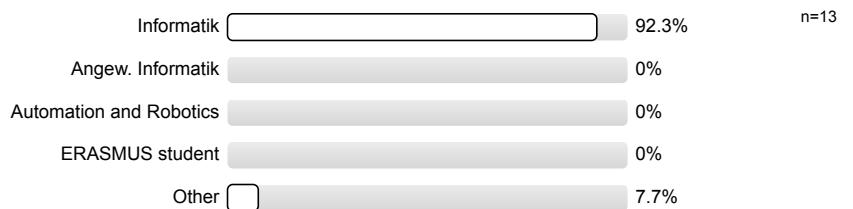

### 2. Statistical Informationen

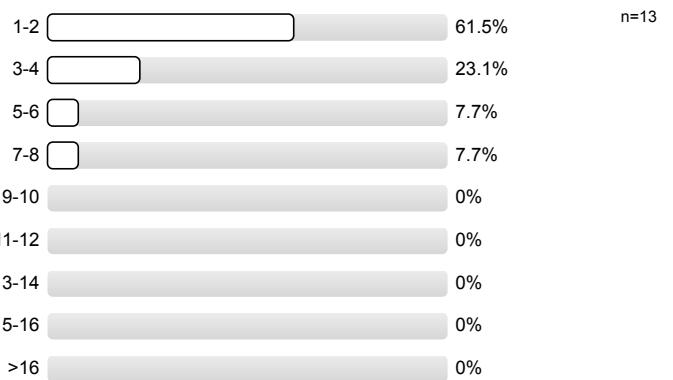

#### 2.1) Target degree

#### 2.2) Programmes

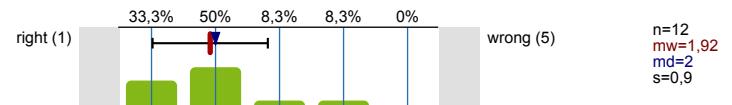

- 2.3) Current term in your current programme of study  
(e.g., tick 3-4 if you are in the 3. semester of the Master programme)

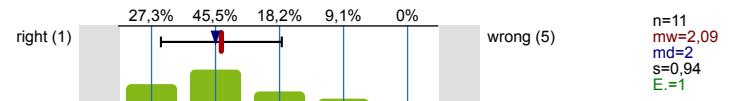

### 3. Evaluation of the content of the course:

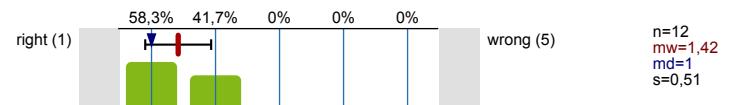

- 3.1) The course provides formal, algorithmic or mathematical competences.

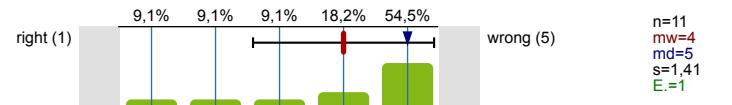

- 3.2) The course provides analysis, design, implementation and project management competences for large computer science projects.

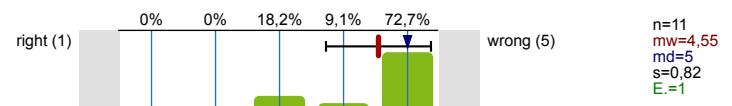

- 3.3) The course provides technological competences (understanding of key interdependences like relations between hardware and software, of operating systems, networks, data bases, intelligent systems and security).

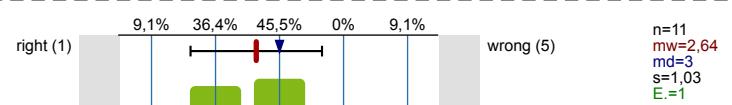

- 3.4) The course provides multidisciplinary competences (ability to work on problems in different application areas, using knowledge in economics, law or foreign languages).

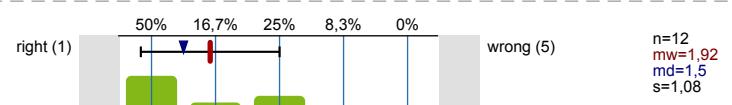

- 3.5) The course provides social competences.

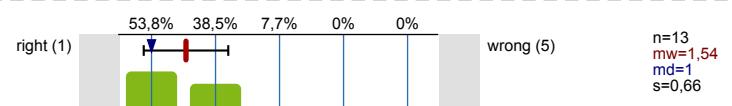

- 3.6) The course contributes to starting my professional career.

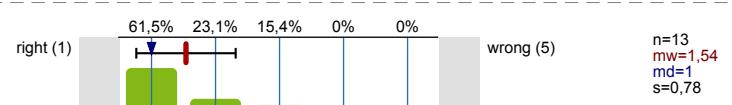

- 3.7) I am familiar with all the assumed prerequisites.

- 3.8) The content's structure can be easily recognized.

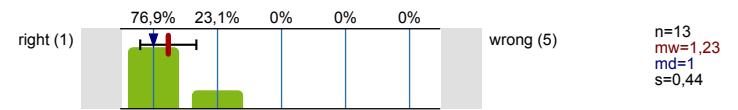

- 3.9) The selection of the content matches my expectations.

3.10) The content matches course descriptions.

3.11) The course is well organized (announced early enough, up-to-date web page, sufficient consulting).

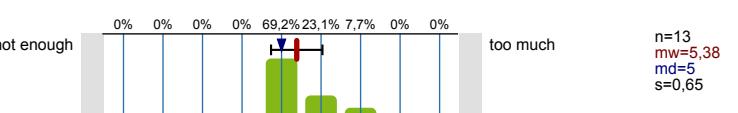

3.12) The room is suitable for the course.

3.13) The time frame is appropriate for the course (duration, date and time, overlap with other courses).

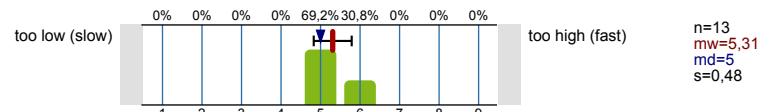

3.14) The course contains not enough/the right amount /too much content.

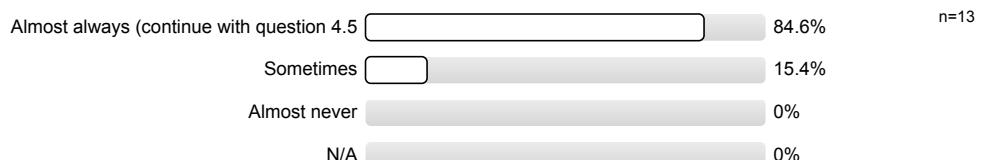

#### 4. Evaluation of lectures

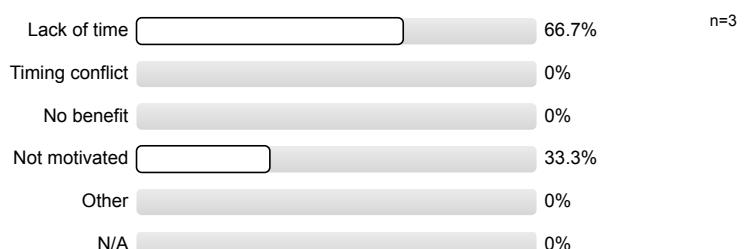

4.1) The speed of the lectures is...

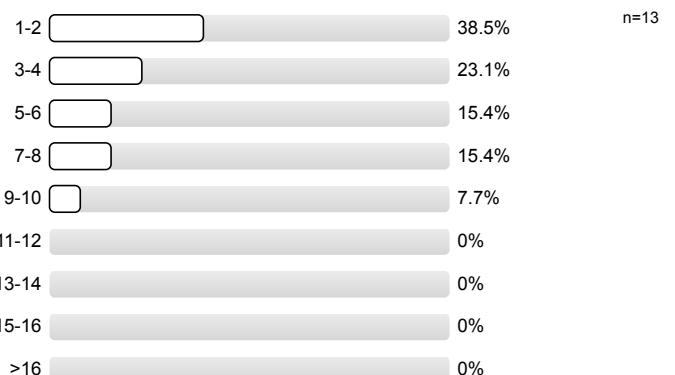

4.2) I attend lectures:

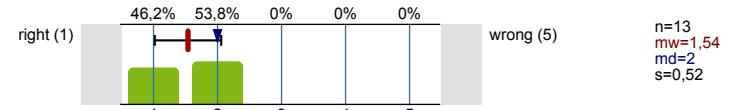

4.3) Reason for skipping lectures:

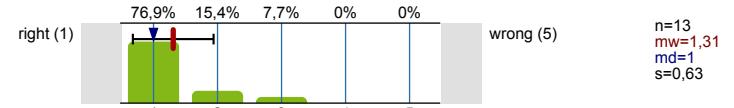

4.5) How many hours per week do you spend on home work, including preparing for the lectures, and on the assignments?

- 4.6) The lecturer uses examples and visualizations to make the lecture easier to understand and to add variety.

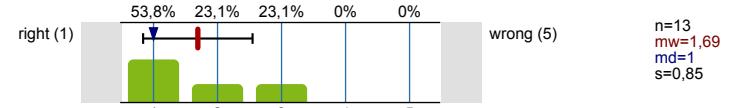

- 4.7) The lecturer is well prepared.

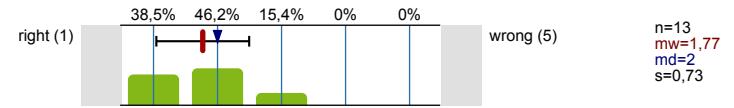

- 4.8) The lecturer is highly motivated and enthusiastic about the material.

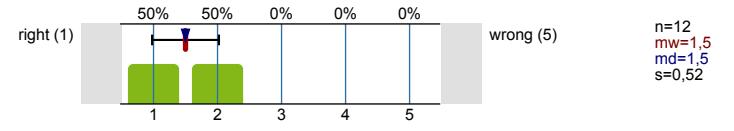

- 4.9) The lecturer explains facts in a simple, understandable and clear manner (and not in a complicated and confusing manner).

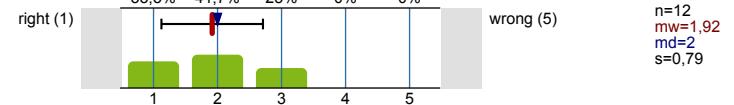

- 4.10) The lecturer focuses largely on the essentials, instead of caring about non-essentials or digressing frequently.

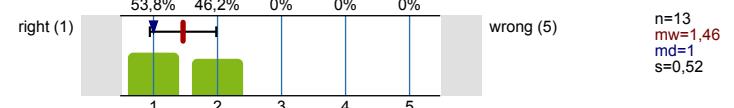

- 4.11) There exists a dialogue between lecturer and audience, at least at times. For example: The lecturer  
 - queries, whether the audience understood the material  
 - raises questions about the content (at an adequate level)  
 - is sufficiently available for questions.

- 4.12) The lecturer uses introductions, repetitions, and summaries to help understanding the lectures.

- 4.13) Acoustics and English (including pronunciation) are good.

## 5. Evaluation on course and lecture materials

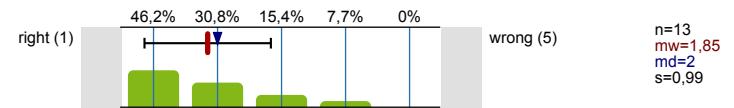

- 5.1) The handwriting of the lecturer (on the black board or the overhead projector) helps understand the lecture and its content (well readable, well-structured, enough time for copying).

- 5.2) Beamer or printed overhead slides help understand the lecture and its content (available before the lecture, few errors, well-structured, sufficiently large font etc.).

- 5.3) Provided slides and manuscript are ideally suited for reading after the lectures (match the lectures, can be used to prepare for the exam, errors are corrected, etc.).

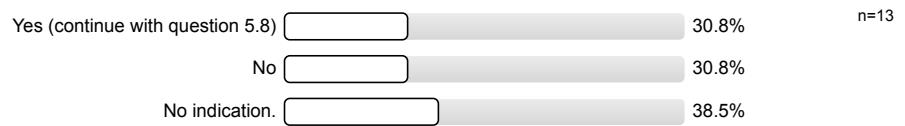

- 5.4) Developed material is provided (material is provided and it contains all necessary explanations, contains few errors, has been published as a book...).

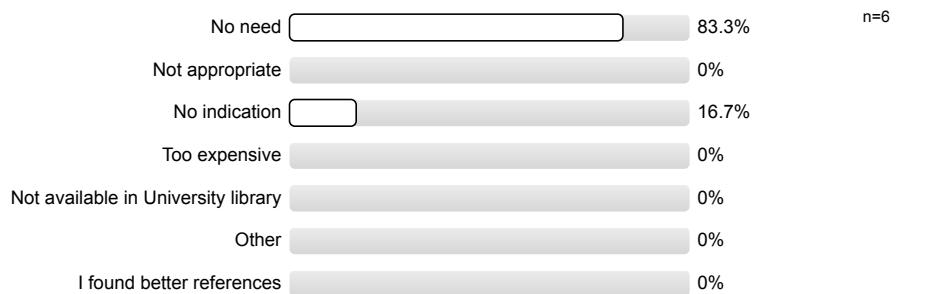

- 5.5) Slides and manuscript are easy to obtain in-time (e.g. through the internet).

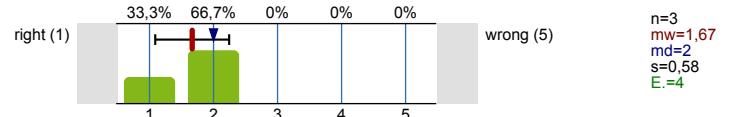

- 5.6) Are you using the recommended references?

- 5.7) If no, why not?

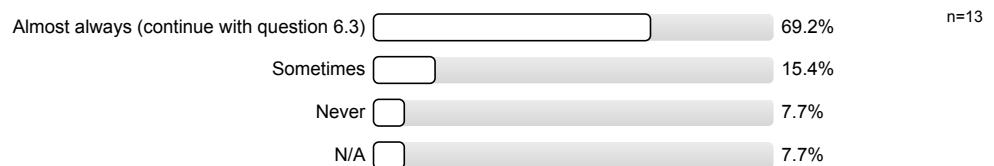

- 5.8) The references are ideal for the reading after the lectures.

## 6. Evaluation of the tutorials:

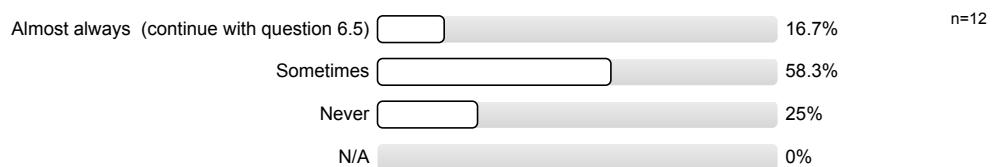

- 6.1) I attend the tutorials:

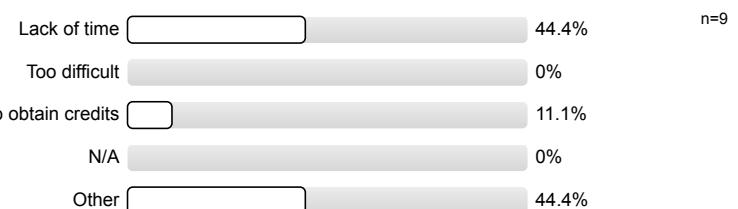

- 6.2) Reason for skipping tutorial:

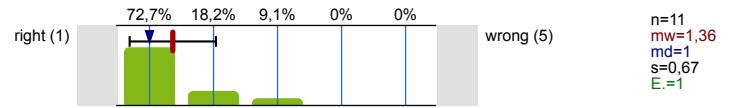

- 6.3) I work on assignments:

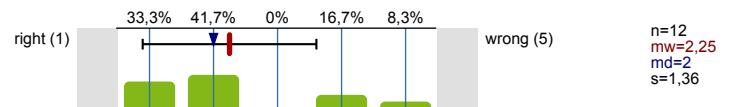

## 6.4) Reason for skipping assignments

## 6.5) Tutorials are contributing towards understanding the content of the lectures/the course.

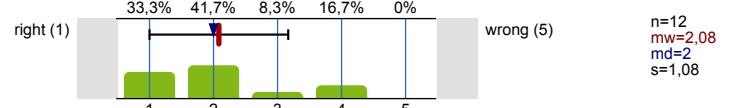

## 6.6) Content and timing of the assignments match the lectures.

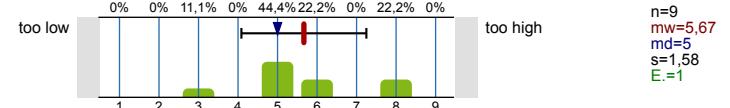

## 6.7) The presentation of solutions for the assignments can be understood easily.

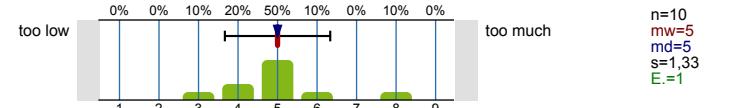

## 6.8) Tutorials are run by competent and well-prepared faculty members.

## 6.9) The level for solving the assignments is...

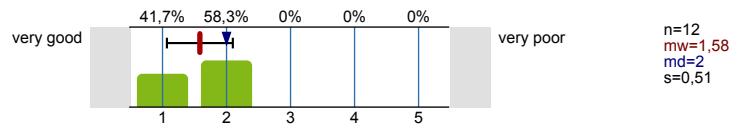

## 6.10) The effort for solving the assignments is...

## 7. Overall score for the course

## 7.1) What is your overall score for this course?

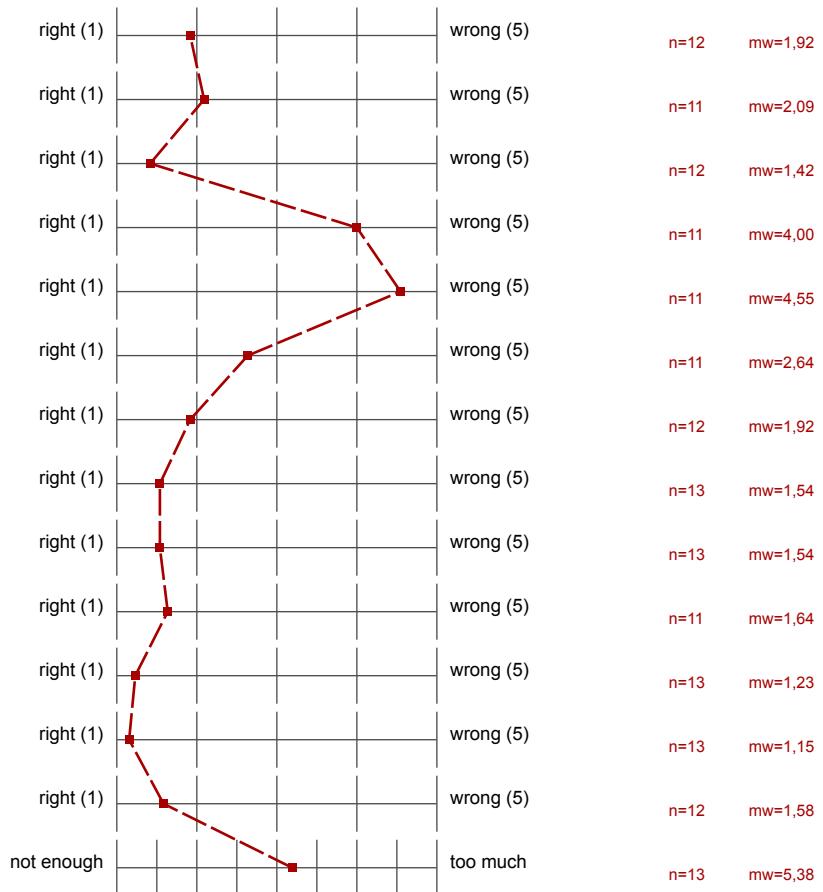

# Profillinie

**Teilbereich:** Fakultät 04 Informatik  
**Name der/des Lehrenden:** Prof. Dr. Jens Teubner  
**Titel der Lehrveranstaltung:** Architektur und Implementierung von Datenbanksystemen (41211\_SoSe19)  
 (Name der Umfrage)

Verwendete Werte in der Profillinie: Mittelwert

## 3. Evaluation of the content of the course:

- 3.1) The course provides formal, algorithmic or mathematical competences.
- 3.2) The course provides analysis, design, implementation and project management competences for large computer science projects.
- 3.3) The course provides technological competences (understanding of key interdependences like relations between hardware and software, of operating
- 3.4) The course provides multidisciplinary competences (ability to work on problems in different application areas, using knowledge in economics, law or foreign
- 3.5) The course provides social competences.
- 3.6) The course contributes to starting my professional career.
- 3.7) I am familiar with all the assumed prerequisites.
- 3.8) The content's structure can be easily recognized.
- 3.9) The selection of the content matches my expectations.
- 3.10) The content matches course descriptions.
- 3.11) The course is well organized (announced early enough, up-to-date web page, sufficient consulting).
- 3.12) The room is suitable for the course.
- 3.13) The time frame is appropriate for the course (duration, date and time, overlap with other courses).
- 3.14) The course contains not enough/the right amount /to much content.

## 4. Evaluation of lectures

- 4.1) The speed of the lectures is...
- 4.6) The lecturer uses examples and visualizations to make the lecture easier to understand and to add variety.
- 4.7) The lecturer is well prepared.
- 4.8) The lecturer is highly motivated and enthusiastic about the material.
- 4.9) The lecturer explains facts in a simple, understandable and clear manner (and not in a complicated and confusing manner).
- 4.10) The lecturer focuses largely on the essentials, instead of caring about non-essentials or digressing frequently.
- 4.11) There exists a dialogue between lecturer and audience, at least at times. For example: The lecturer
- 4.12) The lecturer uses introductions, repetitions, and summaries to help understanding the lectures.

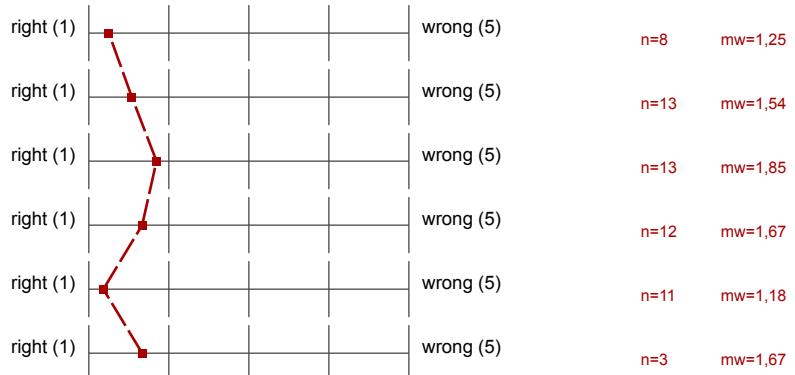

- 4.13) Acoustics and English (including pronunciation) are good.

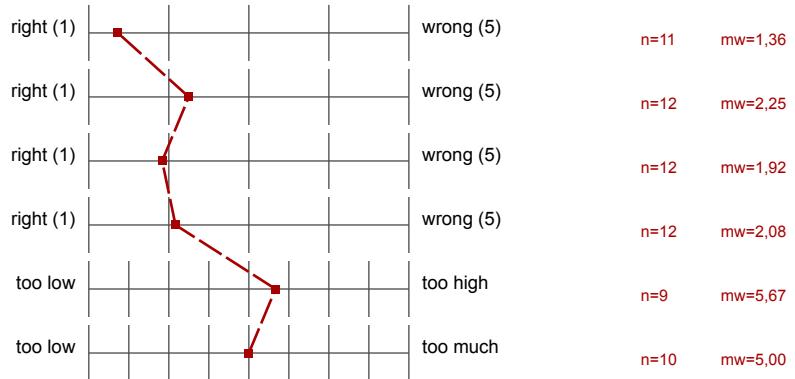

## 5. Evaluation on course and lecture materials

- 5.1) The handwriting of the lecturer (on the black board or the overhead projector) helps understand the lecture and its content (well readable, well-structured, large enough).
- 5.2) Beamer or printed overhead slides help understand the lecture and its content (available before the lecture, few errors, well-structured, sufficiently large).
- 5.3) Provided slides and manuscript are ideally suited for reading after the lectures (match the lectures, can be used to prepare for the exam, errors are corrected, etc.).
- 5.4) Developed material is provided (material is provided and it contains all necessary explanations, contains few errors, has been published as a book...).
- 5.5) Slides and manuscript are easy to obtain in-time (e.g. through the internet).
- 5.8) The references are ideal for the reading after the lectures.

## 6. Evaluation of the tutorials:

- 6.5) Tutorials are contributing towards understanding the content of the lectures/the course.
- 6.6) Content and timing of the assignments match the lectures.
- 6.7) The presentation of solutions for the assignments can be understood easily.
- 6.8) Tutorials are run by competent and well-prepared faculty members.
- 6.9) The level for solving the assignments is...
- 6.10) The effort for solving the assignments is...

## 7. Overall score for the course

- 7.1) What is your overall score for this course?

## Auswertungsteil der offenen Fragen

### 4. Evaluation of lectures

- 4.14) Comments with respect to the lectures:  
*(The handwritten comments are converted to typescript before being passed to the lecturer.)*

- Having a summary slide at the end of each lecture would be great. Also on the website, splitting the lecture slides by class would keep the material more organized.

### 5. Evaluation on course and lecture materials

- 5.9) Comments on the course material:  
*(Please feel free to hint at additional references that might be recommended.  
The handwritten comments are converted to typescript before being passed to the lecturer. )*

- Please provide solutions of programming exercises

### 6. Evaluation of the tutorials:

- 6.11) Comments on the tutorials:  
*(The handwritten comments are converted to typescript before being passed to the lecturer.)*

- Assuming C++ knowledge is a bit of a stretch, considering it wasn't taught in B.Sc.  
Providing learning materials would be a good idea
- Refer to 5.9
- Tutorials are about two weeks behind lectures

### 7. Overall score for the course
